

## Amendment to Specification

Please replace paragraph [0005] with the following:

[0005]        Device loading in storage networks may be implemented in a computer program product encoding a computer program for executing on a computer system a computer process. The computer process may comprise: identifying a plurality of storage devices to be configured in a storage network, identifying a number of host port Logical Unit Numbers or “Logical Units” for short (collective referred to herein as “LUN” or “LUNs”) ~~LUNs~~ configured on each of the storage devices, identifying a number of host port connections to the storage devices, and for each host port connection, determining actual loading for each of the storage devices based at least in part on the queue depth for each of the host port LUNs.
